**OSHKOSH SPECIALTY VEHICLES AND GE HEALTHCARE  
DISPLAY MOBILE IMAGING VEHICLES AT  
RADIOLOGICAL SOCIETY OF NORTH AMERICA (RSNA) SHOW**

*Units bring digital mammography and MRIs to communities in need.*

**Chicago, IL. (December 1, 2008)** -- Oshkosh Specialty Vehicles (OSV), an Oshkosh Corporation (NYSE:OSK) company, and GE Healthcare displayed two mobile diagnostic imaging vehicles at the Radiological Society of North America (RSNA) show at McCormick Center in Chicago, Ill. The units include a mobile digital mammography examination vehicle and a mobile digital Magnetic Resonance Imaging (MRI) trailer.

"These two units represent the impressive capabilities of our mobile imaging vehicles, and each offers a unique ability that enable hospitals and health care agencies to reach communities and populations in need," said John Slawson, Oshkosh Specialty Vehicles president. "We're proud to have these impressive vehicles on display at such an important scientific assembly."

The 40-foot mobile mammography examination suite provides women with convenient and easy access to digital mammography examinations. It includes an advanced GE Senographe™ Essential digital mammography system.

The Senographe Essential features the largest digital detector in the mammography market, advanced ergonomic design for the technologist, optimized patient comfort and seamless workflow connectivity. The foundation of the Senographe Essential imaging excellence is GE's advanced digital detector, which delivers the industry's highest Detective Quantum Efficiency (DQE) - the standard for quantifying digital X-ray image quality-at low doses.

These solutions don't simply offer state-of-the-art technology, they provide a truly user-friendly experience for both patients and technicians.

The mobile digital MRI unit is engineered for quality and cost effective delivery of mobile MRI examinations. The trailer features a roomy interior, with overall length of 51-feet 3-inches, and an overall height of 13-feet 6-inches. A Twin I-Beam chassis and fully welded construction provide unparalleled strength and stability.

The GE 1.5T MRI unit delivers exceptional performance, with a wide-open, high-field configuration that is designed to provide clinical performance without compromise. Its compact magnet size and wide-open design helps patients relax before and during their exams. In addition, the shorter bore features dual flare apertures for greater openness and patient access.

A proprietary magnetic shielding system is engineered to meet or exceed MRI system requirements. In addition, the lightweight, aluminum alloy RFI shielding system is tested by an independent laboratory to ensure compliance with the site plan requirements.

“Mobile mammography and digital MRI scans play a major role in our company’s mission to serve the needs of the mobile medical community,” said Slawson. “Early detection saves lives, and, simply put, these vehicles help our customers deliver better care.”

### **About Oshkosh Specialty Vehicles**

Oshkosh Specialty Vehicles (OSV), an Oshkosh Corporation (NYSE:OSK) company, is a global leader of high technology mobile medical imaging vehicles. The company manufactures, repairs, refurbishes and upgrades specialty trailers, trucks and vans for a variety of medical applications, including Mammography, MRI, PET/CT, Cardiac Catheterization, Medical Clinics, Dental Clinics and Outpatient Surgery. For more information, visit: [www.oshkoshsv.com](http://www.oshkoshsv.com).

### **About GE Healthcare**

GE Healthcare provides transformational medical technologies and services that are shaping a new age of patient care. The company’s expertise in medical imaging and information technologies, medical diagnostics, patient monitoring systems, performance improvement, drug discovery, and biopharmaceutical manufacturing technologies is helping clinicians around the world re-imagine new ways to predict, diagnose, inform, treat and monitor disease, so patients can live their lives to the fullest.

GE Healthcare's broad range of products and services enable healthcare providers to better diagnose and treat cancer, heart disease, neurological diseases and other conditions earlier. The company’s vision for the future is to enable a new "early health" model of care focused on earlier diagnosis, pre-symptomatic disease detection and disease prevention. Headquartered in the United Kingdom, GE Healthcare is a \$17 billion unit of General Electric Company (NYSE: GE). Worldwide, GE Healthcare employs more than 46,000 people committed to serving healthcare professionals and their patients in more than 100 countries. For more information about GE Healthcare, visit: [www.gehealthcare.com](http://www.gehealthcare.com).

### **Forward-looking Statements**

This press release contains statements that the Company believes are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact, including statements regarding the Company's future financial position, business strategy, targets, projected sales, costs, earnings, capital spending and debt levels, and plans and objectives of management for future operations, are forward-looking statements. When used in this press release, words such as "may," "should," "expects," "intends," "estimates," "anticipates," or "believes" and similar expressions are generally intended to identify forward-looking statements. These forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties, assumptions and other factors, some of which are beyond the Company's control which could cause actual results to differ materially from those expressed or implied by such forward-looking statements. These factors include the consequences of the Company's financial leverage position, especially given recent turmoil in the credit markets, and the level of associated borrowing costs; the Company's ability to maintain compliance with financial covenants in its credit agreement; the cyclical nature of the Company's access equipment, commercial and fire & emergency markets, especially during a global economic downturn and credit crisis; the Company's ability to offset higher steel and raw material costs through other cost decreases or product selling price increases; risks related to reductions in government expenditures and the uncertainty of government contracts; risks associated with international operations and sales, including foreign currency fluctuations; and the Company's ability to turn around its Geesink Norba Group business. Additional information concerning these and other factors is contained in the Company's filings with the Securities and Exchange Commission.
