FOR IMMEDIATE RELEASE

OSHKOSH SPECIALTY VEHICLES AWARDED CONTRACT TO BUILD CUSTOM MOBILE TRAILERS FOR 28 VIRTUAL CLEARANCE TRAINING SUITES

Training suites teach tactics to combat improvised explosive devices.

Clearwater, Fla. (June 24, 2011) -- Oshkosh Specialty Vehicles (OSV), an Oshkosh Corporation (NYSE:OSK) company, announced today that it has been awarded a contract from FAAC Inc. to design and manufacture custom trailers for the U.S. Army’s Virtual Clearance Training Suite (VCTS). Each Virtual Clearance Training Suite, housed in multiple custom trailers, will be used by the U.S. Army to teach drivers tactical techniques in a controlled environment. The mobile trailers will be delivered beginning in August and the contract is valued at over $17 million.

“We are gratified and honored to have received this significant order from FAAC to engineer and manufacture custom trailers for their Virtual Clearance Training Suites that will play such a critical role for the U.S. Army,” said Tom Biwan, Oshkosh Specialty Vehicles senior vice president of sales and marketing. “Mobile simulator trailers are an important and growing segment of our business, and the increasing need for mobile simulator training is the reason why.”

OSV custom trailers and shelters are used to house vehicle and aircraft simulators that offer effective and mobile learning in a controlled environment. These units allow for comprehensive student training without endangering lives, wearing out expensive apparatus or burning fossil fuel.

VCTS help prepare and teach Route Clearance Teams on the wide array and ever evolving tactics and techniques used by the U.S. Army to combat improvised explosive devices.

About FAAC
FAAC is world leader in providing simulation based training solutions for military, law enforcement, security, municipal and private industry applications. FAAC is member of the Training and Simulation Division of Arotech Corporation (Nasdaq GM:ARTX).

Forward-Looking Statements
This press release contains statements that the Company believes to be “forward-looking
statements” within the meaning of the Private Securities Litigation Reform Act of 1995. All
statements other than statements of historical fact, including, without limitation, statements
regarding the Company’s future financial position, business strategy, targets, projected sales,
costs, earnings, capital expenditures, debt levels and cash flows, and plans and objectives of
management for future operations, are forward-looking statements. When used in this press
release, words such as "may," "will," "expect," "intend," "estimate," "anticipate," "believe," "should,"
"project" or "plan" or the negative thereof or variations thereon or similar terminology are generally
intended to identify forward-looking statements. These forward-looking statements are not
 guarantees of future performance and are subject to risks, uncertainties, assumptions and other
 factors, some of which are beyond the Company’s control, which could cause actual results to
differ materially from those expressed or implied by such forward-looking statements. These
factors include the impact on revenues and margins of the decrease in M-ATV production rates;
the cyclical nature of the Company’s access equipment, commercial and fire & emergency
markets, especially during periods of global economic weakness, tight credit markets and lower
municipal spending; the Company’s ability to produce vehicles under the FMTV contract at
targeted margins and at required volumes to receive and sustain performance-based payments;
the duration of the ongoing global economic weakness, which could lead to additional impairment
charges related to many of the Company’s intangible assets and/or a slower recovery in the
Company’s cyclical businesses than equity market expectations; the expected level and timing of
U.S. Department of Defense (DoD) procurement of products and services and funding thereof;
risks related to reductions in government expenditures in light of U.S. defense budget pressures
and an uncertain DoD tactical wheeled vehicle strategy; the potential for the U.S. government to
competitively bid the Company’s Army and Marine Corps contracts; the consequences of
financial leverage, which could limit the Company’s ability to pursue various opportunities;
increasing commodity and other raw material costs, particularly in a sustained economic
recovery; the ability to pass on to customers price increases to offset higher input costs; risks
related to costs and charges as a result of facilities consolidation and alignment, including that
anticipated cost savings may not be achieved; risks related to the collectability of receivables,
particularly for those businesses with exposure to construction markets; the cost of any warranty
campaigns related to the Company’s products; risks related to production delays arising from
supplier quality or production issues, especially in light of the significant recent earthquake and
subsequent tsunami in Japan; risks associated with international operations and sales, including
foreign currency fluctuations and compliance with the Foreign Corrupt Practices Act; risks related
to work stoppages and other labor matters, especially in light of the pending contract expiration
for union employees at the Company’s Oshkosh defense facilities; the potential for disruptions or
cost overruns in the Company’s global enterprise system implementation; the potential for increased costs relating to compliance with changes in laws and regulations; and risks related to disruptions in the Company’s distribution networks. Additional information concerning these and other factors is contained in the Company’s filings with the Securities and Exchange Commission. All forward-looking statements speak only as of the date of this press release. The Company assumes no obligation, and disclaims any obligation, to update information contained in this press release. Investors should be aware that the Company may not update such information until the Company’s next quarterly earnings conference call, if at all.
