OSHKOSH SPECIALTY VEHICLES COMPLETES MOVE TO NEW ISO 9001 FACILITIES IN FLORIDA

Customer benefits and market enhancements result from move to ISO 9001 certified manufacturing facilities.

Clearwater, Fla. (July 7, 2011) -- Oshkosh Specialty Vehicles (OSV), an Oshkosh Corporation (NYSE:OSK) company, announced today the completion of the move of its manufacturing, engineering and product development operations to Clearwater and Bradenton, Fla. Both facilities are ISO 9001 certified.

“This has been a seamless transition, and the move from Illinois to Florida provides enhanced benefits to our customers,” said Tom Biwan, Oshkosh Specialty Vehicles senior vice president of sales and marketing. “By utilizing the ISO 9001 certified facilities, and with related Oshkosh companies nearby, we will realize advanced manufacturing capabilities and direct access to shared technologies and product development resources.”

The company will be headquartered at 12770 44th Street North in Clearwater. All design, engineering, assembly, fabrication, paint and product testing for both medical and defense customers worldwide will be completed in the new Florida facilities. Refurbishment services are being provided in Bradenton, Florida and the ISO 9001 certified facility in Weyauwega, Wisconsin.

OSV manufactures, repairs, refurbishes and upgrades specialty trailers, trucks and vans for a variety of applications, including Mammography, MRI, PET/CT, Cardiac Catheterization, Medical Clinics, Dental Clinics and Outpatient Surgery or the medical community. For defense customers, OSV engineers and manufactures shelters and trailers used to house aircraft and vehicle simulators that offer effective and mobile learning in a controlled environment. These units allow for comprehensive student training without endangering lives, wearing out expensive apparatus or burning fossil fuel.

Forward-Looking Statements
This press release contains statements that the Company believes to be “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact, including, without limitation, statements regarding the Company’s future financial position, business strategy, targets, projected sales, costs, earnings, capital expenditures, debt levels and cash flows, and plans and objectives of management for future operations, are forward-looking statements. When used in this press release, words such as “may,” “will,” “expect,” “intend,” “estimate,” “anticipate,” “believe,” “should,” “project” or “plan” or the negative thereof or similar terminology are generally intended to identify forward-looking statements. These forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties, assumptions and other factors, some of which are beyond the Company’s control, which could cause actual results to differ materially from those expressed or implied by such forward-looking statements. These factors include the impact on revenues and margins of the decrease in M-ATV production rates; the cyclical nature of the Company’s access equipment, commercial and fire & emergency markets, especially during periods of global economic weakness, tight credit markets and lower municipal spending; the Company’s ability to produce vehicles under the FMTV contract at targeted margins and at required volumes to receive and sustain performance-based payments; the duration of the ongoing global economic weakness, which could lead to additional impairment charges related to many of the Company’s intangible assets and/or a slower recovery in the Company’s cyclical businesses than equity market expectations; the expected level and timing of U.S. Department of Defense (DoD) procurement of products and services and funding thereof; risks related to reductions in government expenditures in light of U.S. defense budget pressures and an uncertain DoD tactical wheeled vehicle strategy; the potential for the U.S. government to competitively bid the Company’s Army and Marine Corps contracts; the consequences of financial leverage, which could limit the Company’s ability to pursue various opportunities; increasing commodity and other raw material costs, particularly in a sustained economic recovery; the ability to pass on to customers price increases to offset higher input costs; risks related to costs and charges as a result of facilities consolidation and alignment, including that anticipated cost savings may not be achieved; risks related to the collectability of receivables, particularly for those businesses with exposure to construction markets; the cost of any warranty campaigns related to the Company’s products; risks related to production delays arising from supplier quality or production issues, especially in light of the significant recent earthquake and
subsequent tsunami in Japan; risks associated with international operations and sales, including foreign currency fluctuations and compliance with the Foreign Corrupt Practices Act; risks related to work stoppages and other labor matters, especially in light of the pending contract expiration for union employees at the Company's Oshkosh defense facilities; the potential for disruptions or cost overruns in the Company's global enterprise system implementation; the potential for increased costs relating to compliance with changes in laws and regulations; and risks related to disruptions in the Company's distribution networks. Additional information concerning these and other factors is contained in the Company's filings with the Securities and Exchange Commission. All forward-looking statements speak only as of the date of this press release. The Company assumes no obligation, and disclaims any obligation, to update information contained in this press release. Investors should be aware that the Company may not update such information until the Company's next quarterly earnings conference call, if at all.
